COLOURS

Available in a range of colours : blue, red, white, yellow, green

MATERIALS

Polypropylene is generally regarded as chemically and biologically inert. It is recognised to be generally non-allergenic and over many years has been used for items in contact with the skin. Occasionally, however, a sensitive subject may require an alternative material against the skin.

Product

Polypropylene can be disposed of through recycling, incinerated or land filled at a controlled site. The products of combustion are mainly, carbon dioxide, carbon monoxide, water and carbon
